The following is an examiner's statement of reasons for allowance. The prior art taken as a whole neither teaches nor renders obvious a rolling bearing combination including a resin material formed retainer having a plurality of pockets for locking the rolling elements to freely roll where at least one of the pockets is shaped so that the radial clearance gap ratio is $0 \leq \delta r/Da \leq 0.09$ and the axial clearance gap ratio is $0 \leq \delta a/Da \leq 0.06$, where a kinematic viscosity of a base oil at 40 C of the grease is 10 to 40 mm²/sec. The prior art references to Ishiwada et al. 6,648,517, Abe 5,642,945, Miyake 5,522,667, and Osawa et al. 4,493,513, each disclose rolling element bearings specifying an axial clearance gap, but there is no suggestion in any of these prior art references as to the specific radial axial clearance gap. Prior art references to Fujita et al. 6,340,244 and Suzuki et al. 5,401,105 each disclose a rolling bearing lubricated with grease having a kinematic viscosity as set forth in the claims, but do not suggest the combination with the specific axial and radial clearance gap ratios.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Hannon whose telephone number is (571) 272-7104. The examiner can normally be reached on Monday-Thursday (8:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on (571) 272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
